[\[PDF\] On the upper bound on the rotation distance of binary trees](#)[ntust.edu.tw](#) [\[PDF\]](#)F Luccio, L Pagli - Information Processing Letters, 1989 - [graph.cs.ntust.edu.tw](#)

... Denote by T_{ii} the tree thus obtained (Fig. ... Apply algorithm RIGHT to the left subtree of x in T_{ii} , to transform such a subtree into FA (4 TO prove relation (4) observe that when x is raised one level by a left rotation, a **new node** is inserted in $L_{ii}(x)$, while $G_i(x)$ remains unchanged. ...

An O (pn²) algorithm for the p-median and related problems on tree graphs

[ust.hk](#) (PDF)

A Tamir - Operations Research Letters, 1996 - Elsevier

... The **transformation** is executed as follows: 1. First consider each nonleaf node v_j of the orig
inal **tree** which has exactly one child, say v_j(O). Intro duce a **new node**, u_j(I), and connect it
to v_j with a new edge. Assign a weight (length) of zero to this edge. ...
